

REGIONAL SESSION

OWNERS + AEC EXECUTIVES + BIM =

NEW BUSINESS

CALGARY

June 13-14, 2018

Sheraton Suites Calgary Eau Claire
255 Barclay Parade SW
Calgary, AB, T2P 5C2

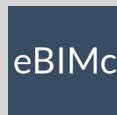

#CGYBIM18

As technology evolves, workflows and delivery methods are changing the way we do business. Owners are progressively understanding the benefits of adopting BIM and are creating a new business vision and strategies, resulting in a shift, which will require the design team, contractors and trades to integrate data and digital information with their deliverables. Doing so will add value to the planning-design-construction-operation process resulting in valuable business opportunities and strategies to all stakeholders. With all this potential, there are many challenges still to address, such as financial, contractual and legal matters among others. Our Calgary Regional Session will address these challenges through a series presentations and panel discussions.
